Sunglasses for Ships®

SOLASOLV® heat and glare protection systems for ships navigation bridge windows
ROLASOLV® sunblinds and blackout blinds for all types of ships window locations

Dear Customer,

FILM / FABRIC CLEANING GUIDE FOR SOLASOLV® AND ROLASOLV® PRODUCTS

Under normal circumstances dusting with a NONABRASIVE dry duster is all that is required. Finger prints, grease and most stubborn marks on the film, can be carefully removed with white spirit and a soft cloth, followed by a further wiping over with a soft non-abrasive cloth dipped in clean soapy water.

If any type of film or fabric becomes very dirty it can be carefully wiped over with a soft non-abrasive cloth and clean water with a little soap or detergent. This will do no harm as long as the film / fabric is allowed to dry completely before retracting. Excess water should be removed as it will leave a water mark when dry.

If you have any additional questions or queries relating to cleaning of the film or fabric please send an email to info@solasolv.com.

Many thanks,

The Solar Solve Team
